

MX04 | Aluminium Carpet Tile to Vinyl Edge

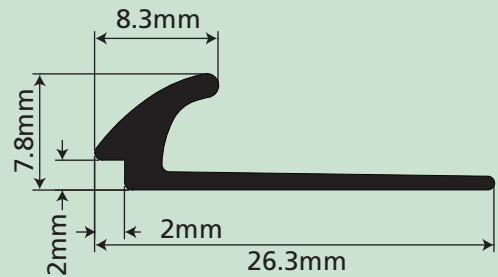

MX04 is designed to facilitate finishing carpet tiles to vinyl tiles or sheetgoods, while maintaining a minimalist visible surface.

MX04 has a specially cut-out notching that ensures excellent fit with existing or new vinyl flooring.

The 5mm cavity edge of MX04 provides protection to the trimmed edge of carpet tiles or direct struck carpets, while the heavily reinforced, ramped edge resists impact from wheeled traffic.

Product Specifications

Product Code:..... MX04
 Aluminium: 6063/T6 Hardness
 Overall Length: 3.66m
 Horizontal Width: 26.3mm
 Vertical Height: 7.8mm
 Finish: Natural Mill
 Processing: N/A
 Pieces Per Carton:..... 10 Lengths

Installation Instructions

May be secured in place by drilling and counter-sinking the screw heads in a drill and plug installation. Where this method is used, it is recommended that a bead of silicone or mastic adhesive is run along both bottom length edges of the extrusion to fill in any surface variations of the concrete floor. This will remove any subsequent “tapping” effect that could develop, or

May be installed by using “MAXBOND SLS Fast Set Gripper and Metal Mouldings Adhesive”, or similar, applied as per manufacturer’s directions, to the underside of the construction joint, should a non-invasive fixing process be desired.
