

## MX05 | Aluminium Construction Cover

MX05 is designed to facilitate finishing flooring installations that require the use of a robust, ramped, flat-based cover plate.

MX05 is not drilled or countersunk to allow versatility in the way it may need to be fixed to the floor.

MX05 provides a double-ramped edge to minimise any possible trip hazard, while being able to resist impacts from wheeled traffic.

### Product Specifications

Product Code:..... MX05  
Aluminium:..... 6063/T5 Hardness  
Overall Length: .....3.66m  
Horizontal Width: .....80mm  
Vertical Height: .....2.8mm  
Finish: ..... Natural Mill  
Processing:..... N/A  
Pieces Per Carton:..... 10 Lengths

*MX05 is deemed to satisfy the requirements and recommendations of The Building Code of Australia, and applicable Australian Standards.*

### Installation Instructions

May be secured in place by drilling and counter-sinking the screw heads in a drill and plug installation. Where this method is used, it is recommended that a bead of silicone or mastic adhesive is run along both bottom length edges of the extrusion to fill in any surface variations of the concrete floor. This will remove any subsequent “tapping” effect that could develop, or

May be installed by using “MAXBOND SLS Fast Set Gripper and Metal Mouldings Adhesive”, or similar, applied as per manufacturer’s directions, to the underside of the construction joint, should a non-invasive fixing process be desired.
