

MX62 | 100mm Aluminium Construction Joint Cover

MX62 is designed to be fitted over existing concrete expansion joints once flooring works have been completed. It is assumed that sub-floors have been prepared according to the relevant Australian/New Zealand Standards (ie. AS/NZ 1884 – 2012).

Product Specifications

Product Code:..... MX62
Aluminium: 6063/T6 Hardness
Overall Length: 3.66m
Horizontal Width: 100mm
Vertical Height: 5mm
Finish: Natural Mill
Processing: N/A
Pieces Per Carton: 10 Lengths

Installation Instructions

1. Construction Joint Cover may be installed by using “MAXBOND SLS Fast Set Gripper and Metal Mouldings Adhesive”, or similar, applied as per manufacturer’s directions to the underside of the construction joint, should a non invasive fixing process be desired, or
2. The Construction Joint Cover may be secured in place by drilling and counter-sinking the screw heads in a drill and plug installation. When this method is used, it is recommended that a bead of silicone, or mastic adhesive is run along both bottom length edges of the extrusion to fill in any surface variations of the concrete floor. This will remove any subsequent “tapping” effect that could develop.
