

MX09 | 3mm x 75mm Aluminium Ramp

MX09 is designed for use in internal installations, where carpet tiles meet 3mm commercial vinyl tiles or sheetgoods.

MX09 is specified to withstand heavy traffic situations that may be encountered in retail, commercial, public areas, along with hospitals and aged care facilities.

MX09 meets the guidelines detailed in AS 1428.1.2009 for ramps.

Product Specifications

Overall Length: 3.66m
Horizontal Width: 75mm
Vertical Height: 3mm
Finish: Natural Mill
Processing: Drilled & Counter-sunk
Screws supplied
Pieces Per Carton:..... 10 Lengths

Installation Instructions

May be contoured by cutting slots at regular intervals across the depth of the profile.

Secured in place by counter-sinking the supplied screws in a drill and plug installation. Where this method is used, it is recommended that a bead of silicone or mastic adhesive is run along the bottom length edges of the extrusion to fill in any surface variations of the hard flooring surface. This will remove any subsequent “tapping” effect that could develop, or

May be installed by using “MAXBOND SLS Fast Set Gripper and Metal Mouldings Adhesive”, or similar, applied as per manufacturer’s directions, to the underside of the construction joint, should a non-invasive fixing process be desired.
