# MJS Tru-Turf "A Greener Solution" INSTALLATION GUIDE

Install your new MJS Tru-Turf synthetic lawn by following these simple steps:

### CHECKLIST:

- ✓ Tape Measure
- ✓ Shovel
- ✓ Road Base
- ✓ Synthetic Turf
- ✓ Roller
- ✓ Utility Knife
- ✓ Pegs
- ✓ Fine Sand

### 1 PREPARE THE SURFACE

Remove the existing top layer of grass (if applicable)

### 2 LAY THE BASE

Apply 50-100mm of road base over area. Spread evenly using a straight edge.

### 3 COMPACT THE BASE

Using a heavy roller, compact the area to ensure a flat and sound base is achieved.

### 4 LAY THE TURF

Lay the Tru-Turf in the required area ensuring that no creases are present.

### 5 TRIMMING / JOINING

If a join is required, use tape and/or synthetic turf adhesive.

### 6 SECURE THE TURF

Using pegs, secure the turf in each corner and roughly every 500mm around the edge.

### 7 SPREAD SAND

Spread fine sand evenly across the surface. Sweep until it disappears into the grass.

### 8 ENJOY YOUR NEW MJS TRU-TURF!
