

Product Data Sheet

Max Bond

POWERHOLD CONTACT ADHESIVE

PRODUCT DESCRIPTION

Powerhold Contact Adhesive is a solvent based contact adhesive used for fixing vinyl skirting and other common flooring materials where a quick contact bond is required to plaster, timber and metal substrates. Not recommended for exterior application.

APPLICATION

To obtain the best results, the materials to be bonded should be dry, clean and free from dust, grit, oil, grease and other contaminants.

Apply an even coat of adhesive to both surfaces to be bonded by brush or roller. On porous surfaces a second application may be required.

Allow solvent to evaporate from the adhesive film and become tacky. Place the surfaces together making sure that they are correctly positioned beforehand as no adjustment is possible after the surfaces have touched.

Press both surfaces together, apply pressure with hand roller making sure sufficient pressure is applied to bring both surfaces into contact. Tack Up time approx. 10 – 15 minutes at 20°C. Open time approx. 45 minutes.

Refer to current AS2455 & AS1884 for further preparation and installation requirements.

CLEAN UP

Clean tools immediately after use with MJS MAX BOND SC solvent cleaner.

TYPICAL PROPERTIES

Appearance	Light Yellow Liquid
Specific Gravity	Approx. 0.84
Viscosity	Brushable Liquid
Shelf Life	Up to 1 year from manufacturing date in sealed container at 20°C
Container Size	1 Litre metal cans
Coverage	3 – 4 m ² per litre.

Note: Always carry out your own test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling and transport is available in the Material Safety Data Sheet (MSDS), available on MJS web site.
