

Product Data Sheet

MAX BOND ENVIRO

SLS FAST SET GRIPPER & METAL MOULDINGS ADHESIVE

PRODUCT DESCRIPTION

MJS Max Bond SLS is ideal for bonding carpet gripper, woods, metal trims, metal nosing, aluminium & many other types of products where a quick bond is required to concrete, timber and most other common building substrates. MJS Max Bond SLS has excellent resistance to high temperatures and water (confirms to Class D4-DIN EN 204)

SURFACE PREPARATION:

All surfaces must be clean & sound, free of dust and any other contaminants that may affect bond.

APPLICATION:

Apply thin bead of adhesive to one surface. Press the two surfaces to be bonded firmly together. Pressure may need to be applied to keep the two surfaces in contact while adhesive cures.

Large extrusions should also be secured with appropriate fixing screws.

CURING TIME:

MJS Max Bond SLS is a moisture cure system. Allow approx one hour curing time. This process may be accelerated by spraying a light mist of water to one of the surfaces. Thick beads will take longer to cure and will have a weaker bond than a thinner bead.

CLEAN UP:

Remove any wet adhesive with Max Bond SC before it cures. When cured remove by mechanical means.

TYPICAL PROPERTIES:

- Appearance: Beige paste.
- Viscosity: Thick paste.
- Specific Gravity: Approx 1.45

Note: Always carry out your own test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling and transport is available in the Material Safety Data Sheet (MSDS), available on MJS web site
