

Product Data Sheet

MAX BOND ENVIRO

WBC WATER BASED CONTACT ADHESIVE

PRODUCT DESCRIPTION

MAX BOND ENVIRO WBC WATER BASED CONTACT is Low VOC that conforms to the Green Star Building Standard. It is a high performance contact adhesive designed for the installation of vinyl skirtings on plaster, timber and metal substrates where quick contact bond is required.

SURFACE PREPARATION

To obtain the best results, the materials to be bonded should be dry, clean and free from dust, grit, oil, grease and other contaminants that may affect the final bond.

APPLICATION

Apply an even coat of adhesive to both surfaces by brush or roller. On porous surfaces a second application may be required.

Allow the adhesive coating to dry and become tacky. (Drying times may vary from 15 minutes to 1 hour, depending on the application method used, the adsorption into the substrate, the temperature and relative humidity of the environment).

Place the surfaces together making sure that they are correctly positioned beforehand as no adjustment is possible after the surface has met.

Press using sufficient pressure to bring both surfaces into close contact.

CLEAN UP

Clean tools immediately after use with warm soapy water. Dried adhesive on tools may be cleaned off using a solvent cleaner.

TYPICAL PROPERTIES

Appearance	Cream / White
Base	Synthetic polymer
Solids	Approx 55%
Viscosity	Creamy Paste
Shelf Life	Up to 1 year in sealed container at 20°C
Freezability	Do not freeze
Container Size	4 Litre plastic pail

Note: Always carry out your own test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling and transport is available in the Safety Data Sheet (SDS), available on MJS web site.
